Application Information:

Please describe your application; detailing how fluid will be removed from drum, e.g. will fluid be drawn out of the container via a pump (if so what type & brand) or will the container be pressurized to “push” the liquid out?

Will an inert blanket gas be used (N₂, CO₂, Argon, etc) to protect oxygen sensitive fluids; or can air come in contact with the fluid as to vent the container when fluid is removed?

Is a “Foot Valve” or check valve required in the liquid line to prevent back flow into the container during periods when the pump is off (a common requirement when electric metering pumps are used or very low flow rates are required)?

Container Details:

Is the container an: IBC _____ Drum _____ Jerrycan/carboy _____

Brand? _____

Model #? _____ Material? _____

Size/Capacity? _____

Closure (bung) #1 Size/Type? _____ #2 Size/Type? _____

Required dip-tube length (As measured from sealing surface of bung hole to bottom of drum)? _____

Will the DrumQuik PRO Drum Insert Assembly (drum insert + dip-tube) be shipped with the container or will it be installed at the point of use by the end user? _____

Does the shipping package (Drum + DrumQuik PRO) require D.O.T./UN Hazmat certification? _____

Fluid Media(s) and % Concentration(s): _____

Is this a General Purpose or Ultra-Pure (Semiconductor/Pharmaceutical) application? _____

May a metallic spring be located in the fluid flow path or is all plastic required? _____

What is the maximum required flow rate & acceptable Pressure drop? _____

Ambient Temperature Range? _____ Fluid Temperature Range? _____

What material & size tubing is being used for liquid line? _____ For vent line? _____

Acceptable Plastic Materials (for DrumQuik PRO): _____

Acceptable Seal Materials: _____

Is keying required to prevent accidental misconnects, if yes, how many keys?

Would Colder's IdentiQuik® Patented RFID system be desired to replace physical keying, to detect flow, etc.?

Approximate annual usage: Drum Inserts: _____ Couplers: _____
